(BGG-1)

9 December 1988

MEMORANDUM FOR: Deputy Director for Administration

FROM: John M. Ray  
Director of Logistics

SUBJECT: New Headquarters Building Sound Problem

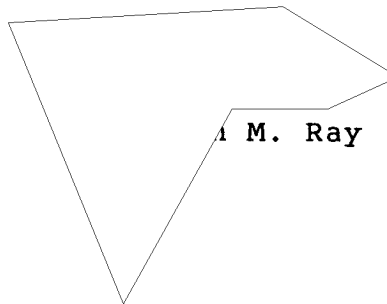

REFERENCE: Memo for DDA, fm C/L/OFM, dtd 15 Nov 88,  
Same Subject

*Ray:*

1. We have completed the prototype project described in the referenced memorandum in the Inspector General's (IG) area in the New Headquarters Building (NHB). Based on the success achieved using blown-in insulation in the IG area, we immediately went on to soundproof the front office area of the Office of Scientific and Weapons Research (OSWR). The work in OSWR was completed on 3 December 1988. We have sound gaskets on order for the doors. This material should arrive and be installed by 31 January 1989.

2. The work described above is being monitored by an acoustical consultant hired by Facilities Management Group, Office of Logistics. His final report will not be available for approximately two weeks. Based on his draft report, we are satisfied that we have achieved acceptable results in the IG and OSWR areas. We are also continuing with our policy to use roll type insulation to provide for soundproofing of areas in the NHB yet to be modified.
